### **EBITDA**

EBITDA in 2Q24 was US\$ 768 million, representing an increase of 77.9% compared to 2Q23, due to better performances in the forestry and energy sectors, and a drop of 9.0% compared to 1Q24, explained by a lower operating income in both sectors.

# 2Q24 / 2Q23

In the quarter, profit reached US\$ 288 million, which positively compares with the US\$ 59 million reported in 2Q23, reflecting an increase in operating income, associated with the forestry sector due to higher pulp volumes and prices, along with a fall in unit sales costs for all fibers. This is in addition to an increase in the energy sector, mainly due to a higher industrial margin, a less unfavorable inventory revaluation effect and higher margins in lubricants.

# 2024 / 1024

Profit was higher by US\$ 60 million, reflecting a less unfavorable non-operating income, mainly due to a positive effect of foreign exchange differences and an increase in income from related companies. This was offset by lower operating income in the forestry and energy sectors, as a result of lower pulp volumes and higher unit sales costs in the forestry sector, and a drop in volumes and a negative inventory revaluation effect in the energy sector.

### 2024 / 2023

Profit reached US\$ 516 million, an increase compared to the profit recorded as of June 2023, explained by higher operating income in the forestry and energy sectors. Arauco recorded higher pulp, panels and sawn timber prices. Meanwhile, Copec reported a higher industrial margin and a less unfavorable inventory revaluation effect.

# Highlights

Empresas Copec successfully placed bonds, achieving the lowest corporate spread so far this year. In addition, it was ratified in its BBB risk rating internationally and AA nationally by FitchRatings and S&P, with stable perspectives. Arauco completed the sale of forestry assets in Brazil for US\$ 1.168 billion, and approved an investment of US\$ 92 million for an OSB plant in Chile. Terpel announced the sale of service stations in Ecuador and Peru. In the ESG area, Copec Voltex will build and operate an electro-terminal for buses in the Biobío Region and signed an agreement with Transelec for an energy storage project, while Abastible signed an agreement to develop a green hydrogen project.

# Net Debt/ EBITDA

Leverage reached 3.0x at the end of 2Q24, lower than the 3.3x and 3.6x reported in 1Q24 and 2Q23, associated with the higher EBITDA obtained in the last 12 months. This is in addition to a drop in net financial debt compared to 2Q23.

|                                    | 2Q 24 | 1Q 24 | 2Q 23 | 2Q24 / 2Q23   | 2Q24/1Q24             | Accum 24               | Accum 23               | Chg. 24 / 23         |

# SIMPLIFIED OWNERSHIP STRUCTURE

# **HIGHLIGHTS**

### **Empresas Copec successfully placed bonds**

On June 26th, 2024, the Company issued AD Series bonds for UF 1,200,000 (approximately US\$ 48.5 million) for a 9-year term, and achieved a placement rate of 3.93%, representing the lowest corporate spread so far this year. The transaction also generated great interest from investors, as reflected in a demand of more than 2.5 times the amount offered.

The proceeds of the transaction will be used to refinance short and/or long-term liabilities of the company and/or its subsidiaries.

# Empresas Copec was ratified in its BBB risk rating internationally and AA nationally by FitchRatings and S&P.

On July 3rd, 2024, S&P ratified the Company's risk rating at BBB stable, noting that the debt ratios are decreasing, and the expectation that the debt ratio will remain around 2.5x between 2024 and 2026.

Also, on July 21st, 2024, FitchRatings ratified Empresas Copec's risk rating at BBB stable on an international level and AA stable on a national level, representing a robust credit profile and a solid commercial position of the Company's main subsidiaries.

# Arauco completed sale of forestry assets in Brazil for US\$ 1.168 billion

In December 2023, Arauco entered into a purchase agreement to sell all the shares and social rights it directly holds in the Brazilian Forestry Companies1 (with assets primarily in the state of Paraná, Brazil) to Klabin SA.

On July 16, 2024, after fulfilling the agreed conditions, the subsidiary transferred the aforementioned assets. The transaction included 85,000 hectares, and the sale price, amounting to US\$ 1.168 billion, was subject to the usual price adjustments after the transaction's closing. The amount received after taxes was approximately US\$ 967 million, generating an after-tax profit of approximately US\$ 174 million, which will be recognized in this year's results.

# Arauco approved an approximately US\$ 92 million investment for an OSB plant in Chile

In an extraordinary session held on July 3, 2024, the Board of Directors of Maderas Arauco S.A. approved the construction of an Oriented Strand Board (OSB) manufacturing line with a capacity of 110,000 m³, within the Trupán-Cholguán Complex. This will be achieved by modernizing and renewing some sections of the MDF line, taking advantage of the existing facilities and incorporating equipment and processes that enable the production of OSB.

The estimated investment is US\$ 92 million. Operations are expected to begin in the second quarter of 2026, with an average workforce of 200 employees.

### Terpel sold subsidiary in Ecuador and assets in Peru

Terpel approved the sale of the assets of Terpel Perú S.A.C and Terpel Comercial Perú S.R.L, corresponding to the operation of service stations. This is together with the disposal of the stake that Terpel holds in Terpel Comercial Ecuador CIA LTDA, dedicated to the service station and convenience store business. The counterparty of this sale would be Primax for US\$ 64 million.

All the operations indicated are subject to the approval of the relevant authorities in each country.

The decision to sell reflects Terpel's interest to focus on the businesses with the greatest growth and profitability potential in each of the markets where it operates.

Terpel stated that it will continue to distribute Mobil lubricants in Ecuador and Peru, and, likewise, will continue with the sale of aviation fuels and the wholesale of liquid fuels for vehicles in Peru and Vehicular Natural Gas (VNG) for mass transportation in its capital city, bringing the value proposition of these segments to consumers and strengthening its leading position in the market.

# **ESG HIGHLIGHTS**

# Copec signs agreement with Transelec for an energy storage project

The agreement between the subsidiary and Transelec, the country's largest electricity transmission company, considers building and operating its first Battery Energy Storage System (BESS), with an energy storage capacity of 420 MWh and an injection capacity of 105 MW.

The project will be developed in Copec's Granja Solar photovoltaic park, which has a generation capacity of 123 MWh, and will be operated by Transelec, with Copec Emoac being responsible for selling the energy.

It is expected to start operating in the first quarter of 2026, transforming the park into a Renewable Power Plant with Storage Capacity, being one of the first projects of this magnitude and type in Chile.

# Copec Voltex to build and operate electro-terminal for RED standard buses in Biobío Region, Chile

Copec announced that its subsidiary Copec Voltex will build and operate the first electro-terminal for public transport with RED standard in southern Chile, in the Biobío region. The project, promoted by the Ministry of Transport, seeks to replace old buses with new RED standard or electric models, which are modern and environmentally friendly.

The electro-terminal will have eight high-powered charger dispensers and will supply energy to a fleet of 16 electric buses. In addition, the charging center will be 100% powered by green energy, provided by Copec Emoac, a Copec subsidiary specialized in renewable energy supply.

Among the benefits of implementing electric buses in the region are the reduction of the environmental impact due to air and noise pollution, since these buses are less noisy than combustion buses and more efficient in the use of energy.

# Copec subsidiaries continue to make progress in sustainability

Flux Solar, Copec's subsidiary, announced an alliance with Chilean Fintech, Galgo, to expand access to solar energy, aiming to facilitate efficient financing to customers for the installation of solar panels in homes in the Metropolitan and Valparaíso regions, in order to promote the energy transition and expand access to renewable generation solutions.

In addition, Terpel Voltex launches the first battery exchange network for electric motorcycles in Colombia in alliance with Gogoro and Motored with the aim of promoting electromobility among smart motorcycles, through a highly efficient service powered by artificial intelligence. In less than a minute, users can exchange their discharged battery for a new one at one of the four stations implemented in Bogota. The goal is to continue expanding to reach new segments and provide innovative solutions to its customers.

# Abastible signed agreement to develop green hydrogen project

The partnership with electric company Comasa will enable the subsidiary to make progress in the first project to produce carbon-neutral fertilizers using green ammonia, carbon dioxide, and bio-ash from biomass power plants.

The project involves an industrial pilot plant in Lautaro, Araucanía Region in Chile, to manufacture hydrogen and produce 40 thousand tons of fertilizers per year.

Abastible will develop the large-scale engineering, operational risk analysis, and will manage SEC authorizations. Comasa will provide infrastructure, agricultural know-how, technology and technical equipment.

Fertilizers are currently imported from China and are made from fossil fuels.

# Arauco's FSC Forest Management audit successfully completed

On July 3, Arauco successfully concluded its follow-up audit of FSC Forest Management (FSC-C108276), carried out by the Soil Association. This was a thorough and collaborative effort to ensure that Arauco's forestry practices meet the highest standards of sustainability and responsibility.

During 30 days of on-site review and 10 days of office work, the team demonstrated the commitment to continuous improvement and efficient resource management. A highlight of this audit was the visit to high value conservation areas and review of some restoration processes within Arauco's forests.

### **Sustainable Bond Reports in Arauco**

Arauco continues to consolidate the path towards a sustainable future by reporting the fulfillment of the social and environmental impact projects associated with the issuance of UF 12 million (equivalent to approximately US\$ 500 million) in sustainable bonds. This figure represents the total funds raised through the sustainable bond issuances carried out in April and June 2023.

Among the projects that were financed, which are classified as sustainable, are some related to sustainable land use and forest management, water management programs, emissions, waste and access to basic services, such as health, water, transportation, education and employment programs, among others. These projects obtained a "very good" rating in sustainability quality score from Moody's Second Party Opinion (SPO).

# CONSOLIDATED RESULTS

**2Q24 / 2Q23. Income** attributable to owners of the controlling interest, net of minority interests, reached US\$ 288 million, a figure higher by US\$ 229 million compared to the result recorded as of the second quarter. This is mainly explained by an increase of US\$ 350 million in the operating income.

In the **forestry sector**, Arauco reported an increase in operating income, due to higher pulp volumes and prices, along with lower unit sales costs in all fibers. This is in addition to better sawn timber prices.

The operating result of the **energy sector** was higher for Copec Chile and Terpel, associated with increases in margins, including the industrial margin, a less unfavorable inventory revaluation effect, and higher margins of lubricants. On the other hand, Abastible reported lower operating income in US dollar.

The Company's **gross profit** grew 45.6%, reaching US\$ 1.139 billion. This was mainly contributed by subsidiaries Copec, with US\$ 503 million; Arauco, with US\$ 468 million; Abastible, with US\$ 113 million; Igemar, with US\$ 48 million; and Sonacol, with US\$ 12 million.

**Non-operating income** decreased slightly compared to the same period of the previous year, as a result of lower other income, associated with the insurance compensation in Arauco received on 2Q23. This was partially offset by a positive effect from exchange rate differences and an increase in income from related companies, mainly due to the restatement of provisions at Metrogas.

# Empresas Copec

**2Q24** / **1Q24. Profit** showed an increase of US\$ 60 million compared to the previous quarter, explained by a higher non-operating income, partially offset by a lower operating income.

The **forestry sector** recorded a drop in its EBITDA of 10.7%, as a result of lower pulp and sawn timber volumes, together with an increase in unit sales costs for most fibers.

The **energy sector** decreased its EBITDA by 12.7% measured in dollars, explained by a drop in Copec of 17.2%, associated with higher administration and distribution expenses, along with lower volumes and an unfavorable effect due to inventory revaluation.

**Non-operating income** was favorable due to a positive effect from exchange differences, higher income from related companies and higher other income, due to an increase in the revaluation of biological assets.

**2024 / 2023. Profit** attributable to owners of the controlling interest, net of minority interests, amounted to US\$ 516 million, an increase of US\$ 302 million over the result recorded as of June 2023. This is largely explained by an increase of US\$ 509 million in the operating income.

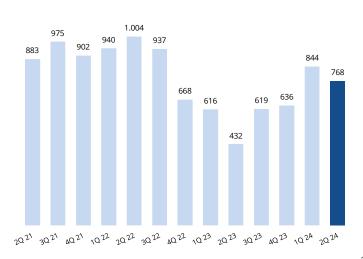

The **forestry sector** recorded an increase in its operating income and a decrease in its non-operating income. Higher volumes were recorded in the pulp business, partially offset by lower pulp and panel prices. In addition to the above, there was lower other income, associated with the insurance compensation for losses during the forestry fires in 2023.

The higher operating income in **the energy sector** is explained by improvements in Copec Chile and Terpel, due to more favorable operating and non-operating income. Meanwhile, Abastible recognized a higher operating income compared to the previous year, reflecting an increase in the performance of its operations in Peru and Ecuador, partially offset by a decline in Chile and Colombia

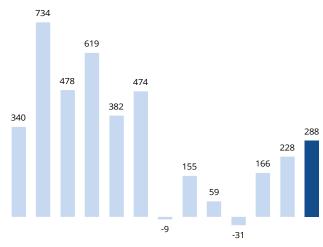

Thus, **gross profit** grew 32.9%, reaching US\$ 2.297 billion. This was mainly contributed by the subsidiaries Copec, with US\$ 1.017 billion; Arauco, with US\$ 976 million; Abastible, with US\$ 209 million; Igemar, with US\$ 76 million; and Sonacol, with US\$ 20 million.

The **non-operating income** did not show major variations compared to the same period of the previous year, as a result of a drop in other income, due to the insurance compensation for losses associated with last year's forestry fires, offset by lower other expenses associated with plant closures that occurred during 2023

### **CONSOLIDATED BALANCE SHEET ANALYSIS**

As of June 30, 2024, **consolidated current assets** decreased 2.6% compared to those existing as of December 31, 2023. This is mostly explained by lower cash at Copec and lower trade and other receivables at Copec and Arauco, partially offset by higher cash and inventory at Arauco.

**Non-current assets** recorded a decrease of 1.8% compared to the end of 2023, largely due to a decrease in property, plant and equipment and biological assets in Arauco.

Total **current liabilities** remained stable compared to year-end 2023, as a result of lower other financial liabilities at Copec and accounts payable at Arauco and Copec, offset by an increase in other financial liabilities at Arauco and other non-financial liabilities at the parent company.

Meanwhile, **non-current liabilities** fell 4.7%, reflecting lower other financial liabilities at Arauco and the parent company.

All in all, **equity** decreased 0.4% compared to December 31, 2023, mainly due to a decrease in other reserves in Copec, Arauco and the parent company, associated with the effect of the depreciation of the Chilean peso on the subsidiaries that have that functional currency.

\* Leverage = Net financial debt / Total equity

### **CASH FLOW STATEMENT ANALYSIS**

**Operating cash** flow as of June 2024 increased compared to the previous year, due to lower payments to suppliers, mainly in Copec and Arauco, and lower dividends paid in the parent company. The above was partially offset by a drop in collections from sales of goods and provision of services in Copec.

On the other hand, **investment cash flow** showed higher net cash outflows compared to 2023. This is mainly explained by other cash inflows (outflows) in the parent company and cash flows to obtain control of subsidiaries in Arauco, partially offset by a lower purchase of property, plant and equipment in the forestry subsidiary.

**Cash flow from financing activities** shows a negative variation, mainly explained by lower amounts from loans in Arauco.

# Adjusted EBITDA Calculation

As from 1Q13, Empresas Copec presents an alternative calculation of EBITDA, denominated "adjusted EBITDA". The methodology, adopted by the subsidiary Arauco in 2012, better suits the IFRS definition of the indicator, and has the advantage of including the profits from associates. These may be especially relevant for Empresas Copec, given the importance some associates may acquire.

|  | 2Q 24 | 1Q 24 | 2Q 23 | 2Q24 / 2Q23 | Accum 24 | Accum 23 | Chg. 24 / 23 |
|--|-------|-------|-------|-------------|----------|----------|--------------|
| Net Income   | 308   | 248   | 64    | 378.0%      | 556      | 229      | 142.7%       |
| (-)Financial Costs                                       | (162) | (160) | (176) | (7.8%)      | (322)    | (330)    | (2.4%)       |
| (-) Financial Income                                     | 37    | 45    | 41    | (8.5%)      | 82       | 76       | 7.7%         |
| (-) Income Tax   | (86)  | (60)  | (2)   | 4,828.3%    | (146)    | 14       | (1177.4%)    |
| (+) Depr & Amort   | 243   | 244   | 245   | (0.7%)      | 486      | 438      | 10.9%        |
| (+) Fair value cost of timber harvested                  | 112   | 105   | 121   | (7.4%)      | 217      | 206      | 5.1%         |
| (-) Gain from changes in fair value of biological assets | 21    | 5     | 56    | (62.8%)     | 26       | 109      | (76.3%)      |
| (-) Exchange rate differences                            | 32    | (54)  | (42)  | (176.4%)    | (21)     | (24)     | (11.1%)      |
| (-) Others*  | (14)  | (1)   | 22    | (166.4%)    | (15)     | (17)     | (9.2%)       |
| Adjusted EBITDA**  | 836   | 822   | 532   | 57.0%       | 1,656    | 1,047    | 58.2%        |

<sup>\*2</sup>Q24 includes impairment of goodwill and property, plant, and equipment, and obsolescence of materials and supplies. 1Q24 includes provisions for forest fire losses. 2Q23 includes compensation for forest fires and property, plant, and equipment of MMUS\$ 22.8

Figures in US\$ million

Traditional calculated EBITDA (EBITDA Operating Income + Depreciation + Amortization + Fair value cost of timber harvested), and adjusted EBITDA may differ given the methodological differences.
